

Drop Down Day

Quwwat ul Islam Girls' School

Year Group	Year 11
Trip Location	Centre of cell (Whitechapel)

The trip to the centre of cells was linked to KS4 biology curriculum. The centre of the cell is based within working biomedical research laboratories.

The student first met two 4th year medical students who took us through their journey at Queen Mary university and how they have managed to enter the medical school and what they are planning to do in future.

The students took part in the pod show which was led by the medical students. The first part of the pod show- an introduction to cell biology was displayed on overhead circular screens while the nucleus remains closed.

The student then took part on the second pod show where Nucleus was opened, allowing students to play interactive games related to cell biology.

Students also took part in the question-and-answer session where they were allowed to ask questions related to medical field.
