

QUIGS Drop down day

QUIGS Drop Down Day- Wednesday 30th March 2022

Year Group	Year 5
Trip Location	Thames Barrier Park
This term Y5 have been learning about pollination during their science lessons, this trip gave students the opportunity to look at different plants/flowers and see how pollinators like butterflies, bees and hummingbirds may rely on the plants in the park for food and habitat. Students were also able to look around the park and draw the plants/flowers - labelling each part correctly. The last activity for the day was that they were able to go through the maze in the park – the first team to get to the end were the winners! All students participated in activities and thoroughly enjoyed the trip.
