

Post 16 Workshop

26th November 2025

Representatives from New City College will be speaking to the girls about post-16 pathways, including A-levels, BTECs, T Levels, and apprenticeships. The session will cover the differences between these routes, entry requirements, and the level of independence expected in further education. They will also explain recent changes to BTEC courses and provide an introduction to T Levels. Students will be encouraged to prepare for their next steps by researching their options, attending open days, and continuing to develop key skills such as Maths and English. The talk will emphasise the importance of planning ahead and making informed choices in order to progress successfully in their chosen pathway.
